

Experience the **Elite** difference.

“Your hardware decision was the result of careful planning and tireless research...shouldn’t the same diligence go into your connectivity? Elite Series cables are engineered with the highest quality components and user-friendly features for effortless installations and a lifetime of reliability.”

The Elite Difference	The Elite Benefit	Elite Series	“cheap” stuff
100% stranded bare copper wire (required to meet the UL444 Code and TIA-568 specification) 1	Less dropped packets while delivering PoE/PoE+ safely and with predictable reliability	✓	Thinner gauge wire Copper Clad Aluminum (CCA)
Extended locking tab with FlexLite Boot 2	Effortless removal from high-density switches with recessed ports, plus protection/strain relief	✓	-
50 micron gold-plated contacts 3	Superior electrical contact over the life of the patch cable	✓	Flash plating
Exceptional value	Save money without compromising performance	✓	-
Manufactured in ISO9001 registered facility Independently tested to 350MHz (Cat5e) & 550MHz (Cat6) TIA/EIA Compliant, RoHS Compliant, UL Listed	Consistent quality for maximum throughput and performance	✓	-

All Elite Series cables include a Lifetime Warranty and are available in a wide range of stock and custom sizes/colors.
